## A Brandable Online Payment Solution

The One Terminal solution is a client-facing payment solution that is hosted in the Google cloud. The solution allows our clients to process in-person and phone transactions as well as the ability to enroll cardholders into recurring or scheduled transactions. Additionally, this solution is capable of supporting fee-based and absorbed fee payment processing models.

## Key Platform Features & Functions

All of our payment solutions undergo rigorous annual "Level 1" PCI security reviews and adhere to all Payment Card Data Security Standards (DSS).

All of our cloud-based payment solutions are securely hosted in the Google Cloud which means a worry-free experience, exceptional uptime and an unlimited bandwidth via their managed instance group autoscaling capability.

The IntelliPay platform supports multiple User hierarchies. Masters and Administrators can fully manage downstream users and assign a multitude of processing and reporting rights, permissions and passwords.

The IntelliPay platform is highly configurable and includes customizable reporting & research options with multiple configuration settings such as Client Department drop-down menus and Client defined custom data fields.

We get it, data capture and multiple reporting options are critical to managing any Business. Tell us what data is important and we'll securely manage the data and provide detailed reporting and research options.

All of our solutions are capable of supporting multiple fee-based payment models and types, including Visa, Mastercard, Discover, American Express, ACH or eCheck payment processing.

Dedicated developer support is where we excel. We'll work closely with you to integrate, design, configure and deploy the right solution for your specific requirements and provide ongoing developer support.
