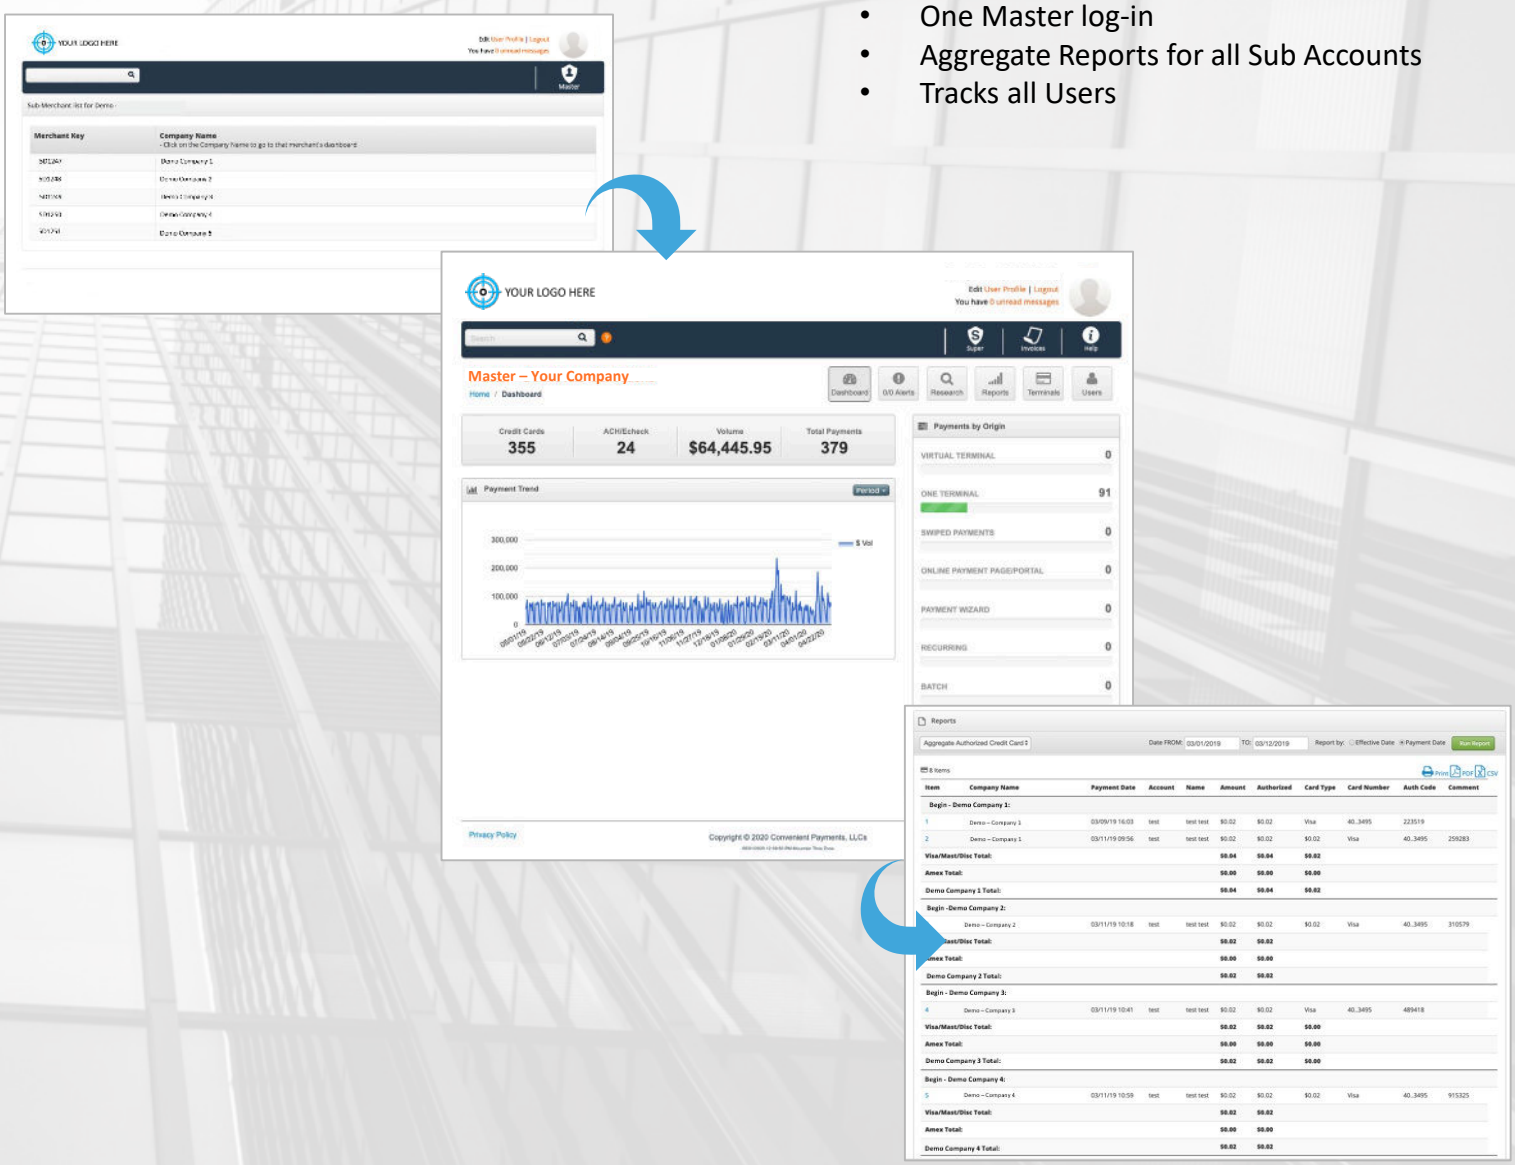
IntelliPay Master Portal

Comprehensive Management and Reporting

Enterprise organizations and other merchants with multiple accounts can have their sub accounts rolled into one main, aggregate report for quick and easy reconciling. We can customize our reports to match any format. This is especially necessary when integrating our reports back into a management software provider. We can match their format enabling you to upload the report for automatic posting.


- Master Account Management (Parent/Child Relationship)
- One Master log-in
- Aggregate Reports for all Sub Accounts
- Tracks all Users
