

Speed Payments, Reduce Receivables

Getting invoices sent out on time and limiting postal delays are just two of the ways email can speed-up payments and reduce receivables.

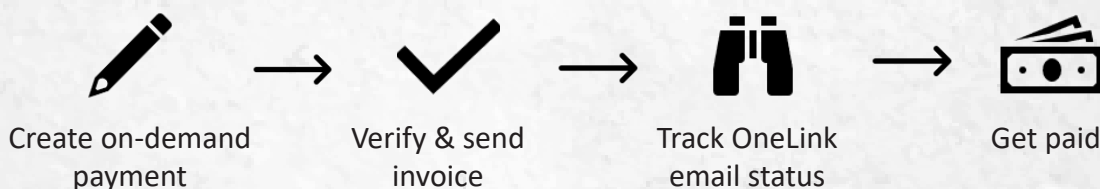

Plus, you can safely send emails from anywhere and eliminate the costs of printing invoices, stuffing envelopes and postage - saving time and money.

Contactless Payment Requests Via Email

Integrated into our payment suite is OneLink, an on-demand email portal. OneLink makes it easy for you to send and customers to pay through a secure email payment link. Functioning like a familiar “Pay Now” or “Pay Invoice” button, customers are motivated to pay upon receiving the customizable and branded email.

OneLink captures unique IDs like invoices or account numbers, provides detailed email tracking and reporting, and more using your current email provider.

Easy as 1-2-3-4

Our SaaS based, PCI DSS Level 1 compliant, cloud-based payment suite is extremely secure, and fully scalable to grow alongside your business.
