

4. If your Terminal does not look like this when powering It up, you need to contact IntelliPay

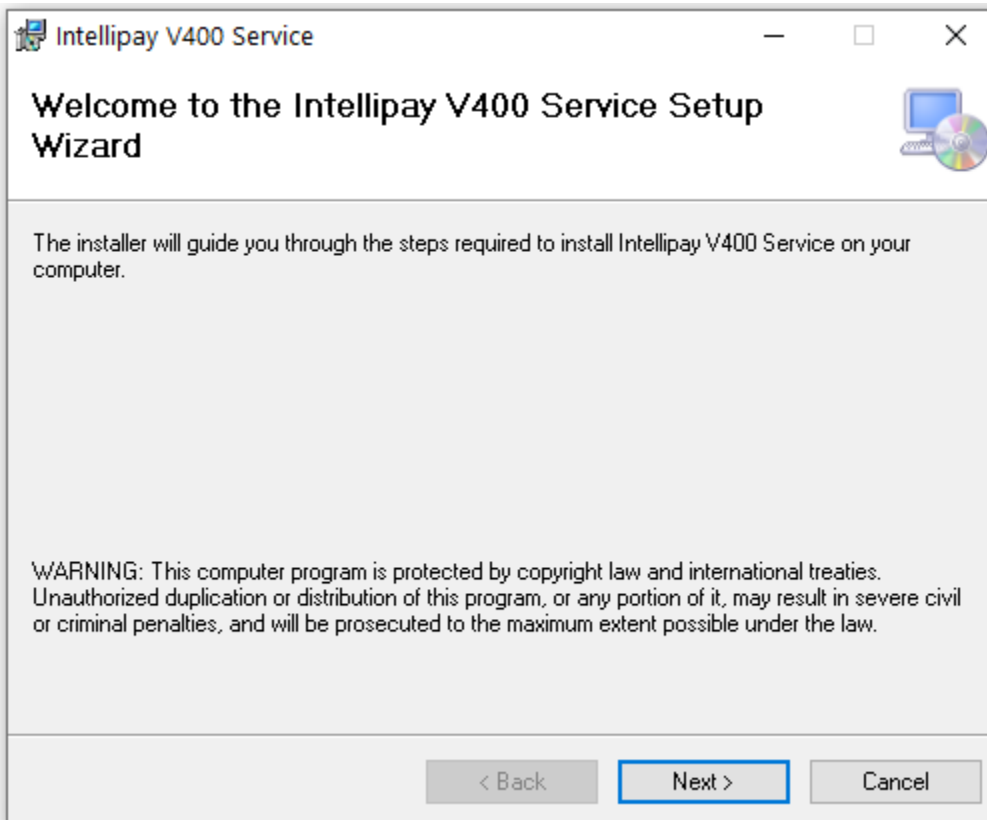

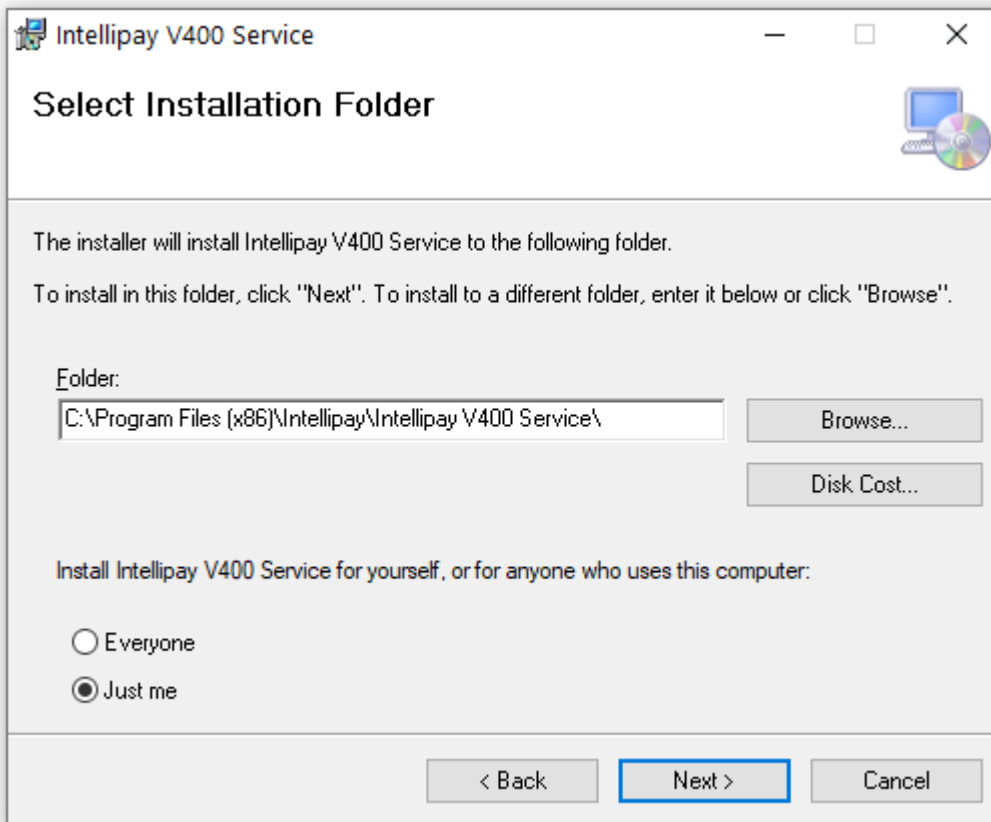

Figure 4 - acceptance screen

Installing the V400 SAAS Service

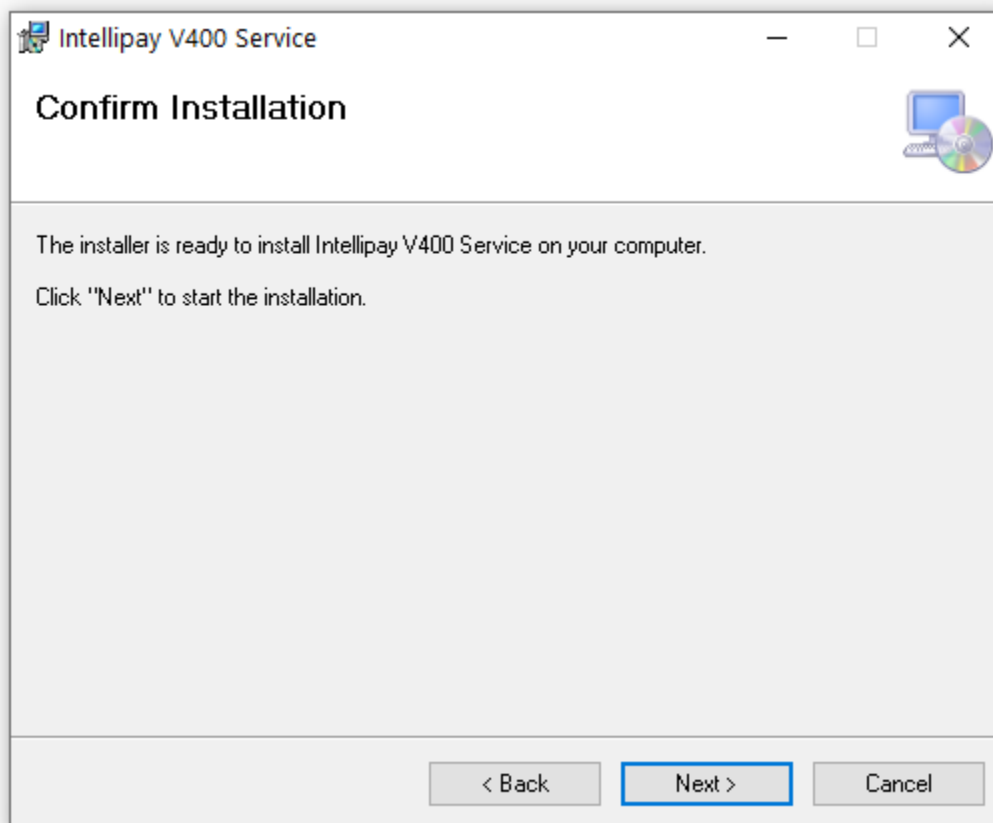

1. Download the Installer file from the CPTeller site.
2. Hit Next

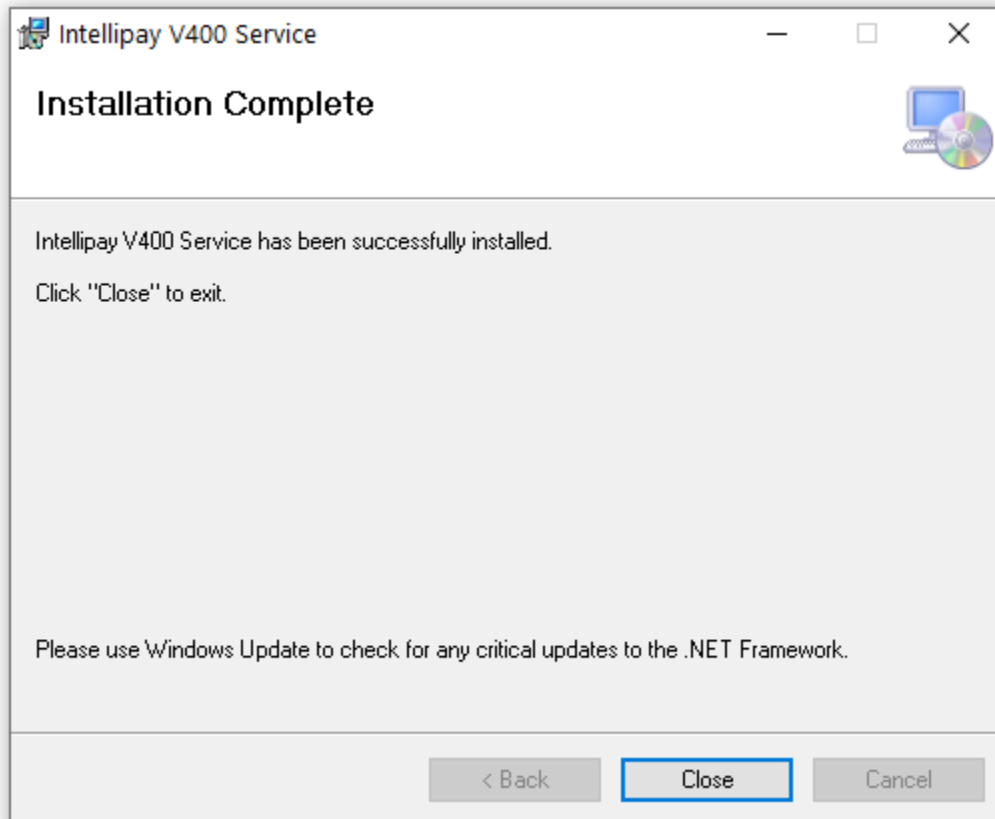

3. Hit Next

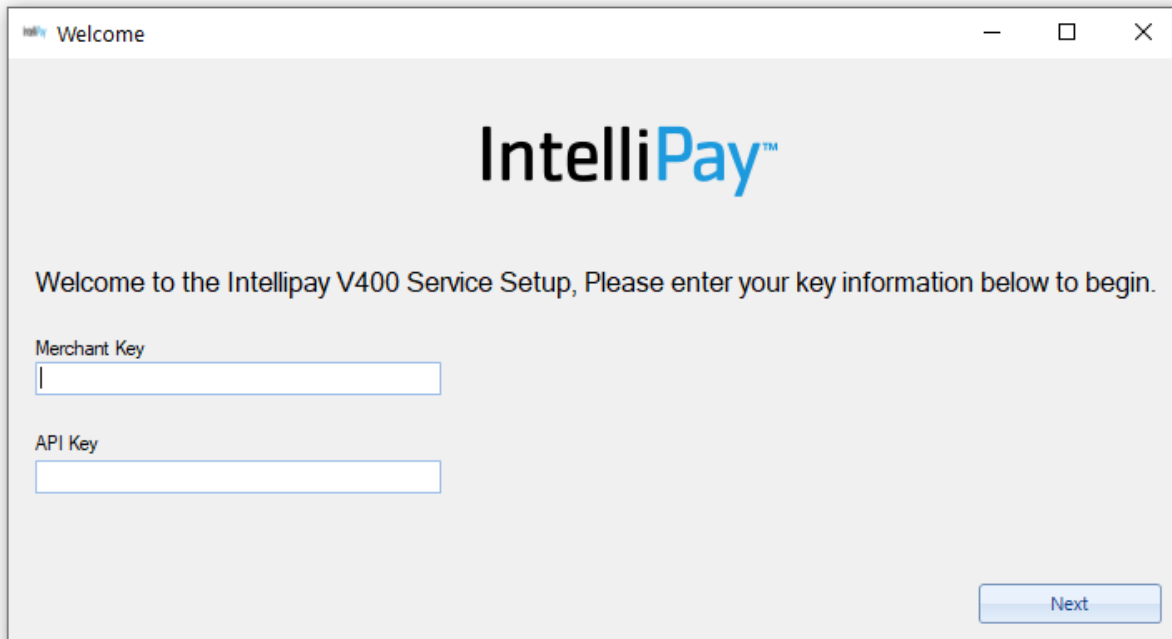

4. Hit Next and the installer will install the service

5. You might be prompted to allow the application to install by windows and also by your antivirus. When you get to the last screen select Close.

6. Another box will be opened up like the one below, You will need to put your Merchant Key and API key in before continuing.

The image shows a software window titled "Welcome" with standard Windows window controls (minimize, maximize, close). The window content features the IntelliPay logo at the top center. Below the logo, a message reads: "Welcome to the Intellipay V400 Service Setup, Please enter your key information below to begin." There are two input fields: the first is labeled "Merchant Key" and the second is labeled "API Key". A "Next" button is located in the bottom right corner of the window.

Welcome

IntelliPay™

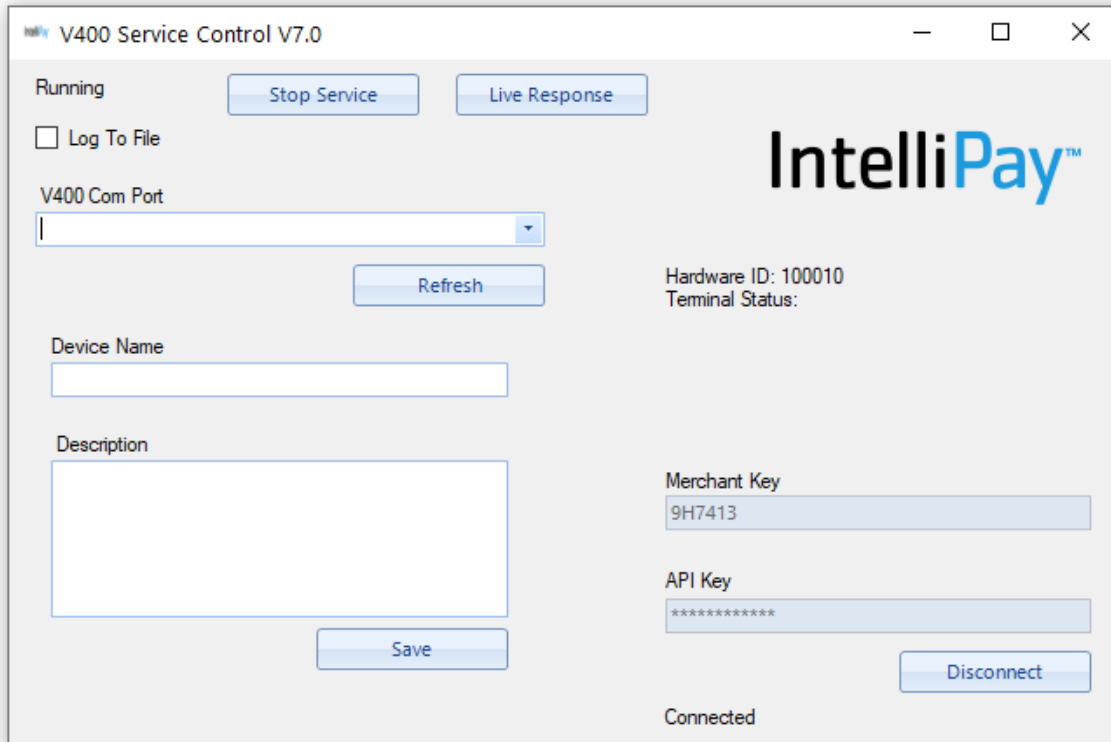

Welcome to the Intellipay V400 Service Setup, Please enter your key information below to begin.

Merchant Key

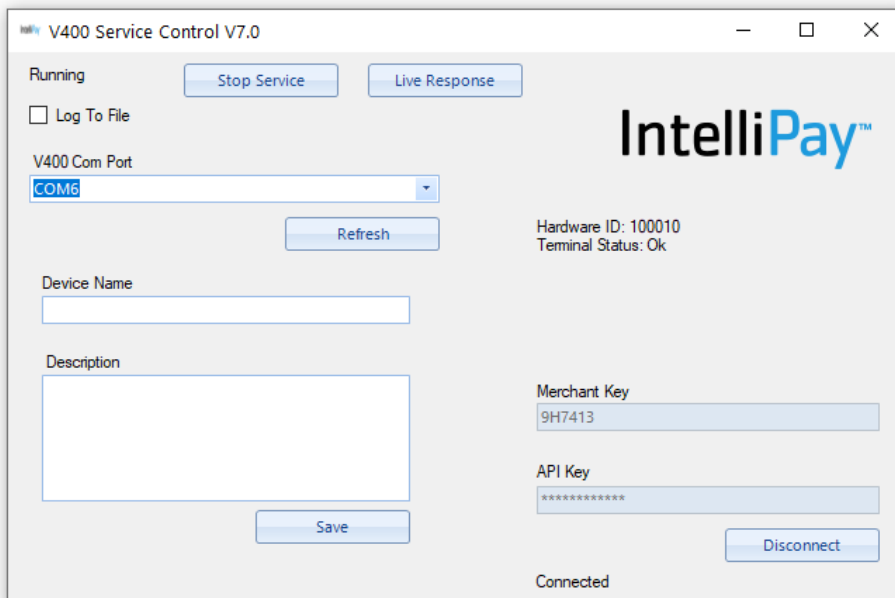

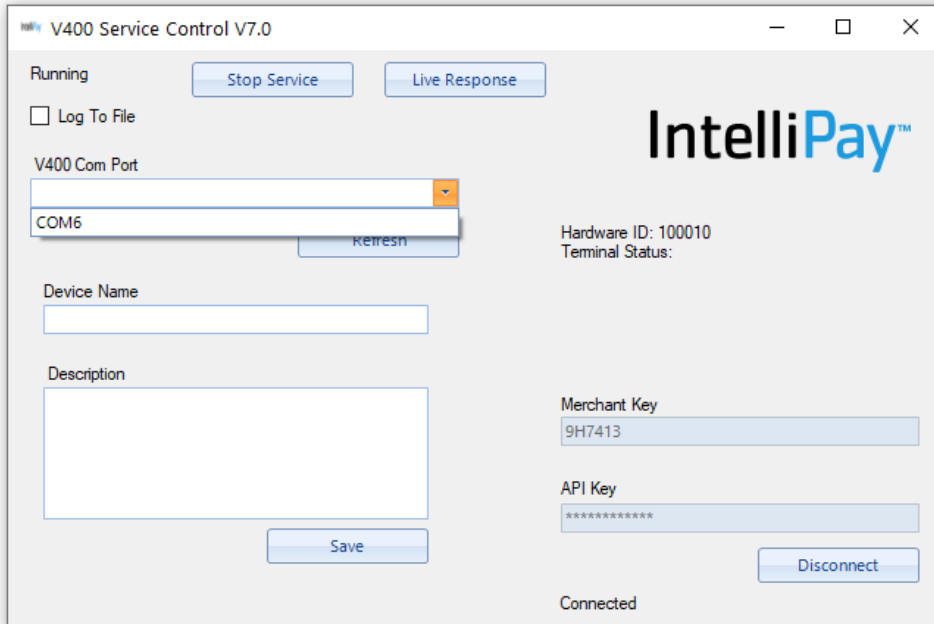

API Key

Next

7. Hit Next and it should connect to the SAAS service and open up this screen.

8. You need to select the COM port that the V400 is connected to.

9. You can elect to name the device and save it if you would like
