NO COST/ REDUCED COST CREDIT CARD SOLUTIONS

IntelliPay®

The Problem

Merchants are frustrated with paying high Credit Card fees

According tothe Nilson report merchants paid **$160.7 billion** in 2022, an increase of 16.7 percent- from 2021.

Nilson Rpeort , March 2023

Credit cards account for 54.4%of purchase volume in 2022 up form 51.4 % in 2021.

Nilson Rpeort , March 2023

92% of credit card transactions are on premium or reward cards resulting in ever higher merchant fees.

Wall Street Journal, January 25, 2018

IntelliPay offers three solutions to significantly reduce or completely eliminate High Credit Card Fees.

All solutions are 100% compliant and currently in place for thousands of merchants.

SOLUTION 1 - SERVICE FEE

Government and educational entities need a no-cost solution to satisfy strained budgets.

Service Fee

Overview

Our Service fee program eliminates the credit and debit card fees government and educational institutions pay by adding a fixed or variable fee to the amount due

Results

The government or education institution benefits from this no-cost solution as the cardholder pays all processing costs.

Focus - verticals

- Government
- Educational Institutions
- Card not present
- In-person

SOLUTION 2 - DEBIT ONLY

A debit only based alternative that eliminates the higher processing costs merchants pay on premium credit cards.

Debit Only

Overview

Our Debit Card Only solution identifies the credit and debit card numbers and prohibit credit cards while allowing debit cards.

Credit Cards are tied to Reward Programs causing higher processing fees. With the Debit Card Only Program, you remove credit card processing and only accept debit cards.

Results

This option is a niche option for certain verticals and merchants; however, it's highly effective. Your entity can significantly reduce high credit card fees by adding ACH processing and still accept debit cards and ACH payments.

Our Convenience fee program is an additional option to eliminate fees outside traditional channels.

Focus - verticals

- All merchants
- Card not present
- In-person

SOLUTION 3 - FAIRPAY

Merchants eliminate their credit card processing costs by adding a surcharge fee to all invoices paid by credit card.

FairPay

Overview

FairPay reduces credit card fees by adding a 2%-3% surcharge fee to the amount due. Debit Cards are not surcharged and are billed to the merchant.

Results

This program significantly reduces merchant processing fees because customers pay for credit card fees when using their rewards card, while the merchant pays for the debit card fees at lower rates. The hybrid of who pays is “Fair.”

Focus - verticals

- All merchants
- Card not present
- In-person

SOLUTION

Depending on the solution selected, IntelliPay's technology will identify the card type and add the fee accordingly.

Whether a merchant selects FairPay, Service Fee or Debit Only solutions, you can combine them with ACH processing to provide an alternative payment method that doesn't charge a fee to the customer.

HOW IT WORKS

1. IntelliPay technology identifies card type (credit or debit) and applies the fee based on admin-defined rules.

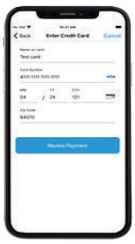
2. Fees are calculated and added to the invoice total. Amount due, Fee Amount and Total Paid Amounts are displayed.

3. The customer is required to accept the terms and conditions. If they do not wish to pay the fees, an ACH alternative can be provided.

4. Payment is processed. Funds are deposited to the appropriate bank account(s) according to admin rules.

Since 2011, our turnkey payment suite has made it easy to compliantly process millions of fee-based transactions for governments and organizations of all sizes.

OMNICHANNEL SOLUTIONS



Mobile/Field
iOS & Android compatible for mobile acceptance

Virtual Terminals
The One Terminal is a hosted staff facing payment page with retail and EMV configurations
