

Batch Upload Terminal

How It Works

Secure and easy way to upload files into the IntelliPay payment suite. Upon upload, we check and flag duplicate files at the transaction and batch levels. Duplicate files are flagged and reversed when a settlement file is received. Additionally, potentially fraudulent transactions are flagged and reviewed by our risk department.

Why IntelliPay's Plug-in?

- Secure file uploads
- Simple to use
- Data is imported directly into our database

QUICK FACTS

**Fast and secure upload
of sensitive files**

**Available anywhere using
cloud-based console**

**Easy to use – we set it
up for you, nothing
to buy or download**

USE CASE

Pre-populate customer data into web forms and other IntelliPay front-end solutions.
