IntelliPay™

IVR - Interactive Voice Response

How It Works

IVRs give consumers a contactless, self-serve way to pay while reducing late and delinquent payments. In the past, IVRs were cumbersome and expensive. IntelliPay's IVR solution is easy to set up and use and steps up from basic pay-by-phone functionality to a fully integrated solution with transactions recorded in real-time. For more on our IVR solutions, click here.

Why our IVR?

- Customizable to your business needs
- Use only the features you need
- More cost effective than a live operator
- Easy-to-use, less complicated than other IVRs

QUICK FACTS

Adds another contactless payment option

Basic, semi-integrated and integrated options

Easy REST API integration
