IntelliPay™

Lightbox Online

How It Works

Lightbox Online adds a simple payment pop-up to any payment or invoicing screen, making card-present payments convenient for customers and staff alike. Lightbox online is ideal for kiosks and other internet-enabled self-service stations. In addition, all transactions are on our PCI network, reducing merchant PCI audit scope.

Why use Lightbox?

- Robust tool with many configurable features
- Quickly add payments to any page or application
- Customizable and brandable

- Centralized, real-time reporting for all payments
- Sample code and documentation for easy integration

QUICK FACTS

Lightbox Online is a payment form that floats over existing website or software content

Payers submit payments without appearing to leave site or application

Sample code makes integration easy

USE CASE

Adding card-present payments to on-premise devices to kiosks or internetenabled terminals.
