

# Online Payment Page

## How It Works

Customers and staff can use the online payment page as a hosted webform on any web-connected device for card-present payments. The modern, clean interface enables custom data fields, branding, terms, Gpay, and eCash payments. Post-back data is available to host applications when integrated with existing systems.

## Why use our Online Payment Page?

- Quickly add payments to any page or application
- Customizable fields and brandable
- Single solution - two configuration options
- Centralized, real-time reporting for all payments
- Used as a hosted web form, documentation for easy integration

### QUICK FACTS

Online Payment page is easily added to any web page

Integratable version available

Fully hosted on our network, reduces PCI audit scope

### USE CASE

Any organization that wants a single, fully-hosted, customizable payment solution for every department or location.
