

One App

How It Works

Embed our code into your app and get world-class payment functionality and a superior UX without the cost and time delays of an in-house solution. And, since all payments are processed on our PCI network, we also eliminate most of your PCI compliance burden.

Why Mobile app in an app?

- Creates a seamless, branded payment experience
- Adds payments to their app easily and compliantly
- Avoids the time and expense required to develop a payment processing solution
- Puts transactions on our network, placing PCI compliance out of scope

QUICK FACTS

Adds payment functionality to an existing app

Customizable and brandable

Connects to our PCI network, reducing compliance risk

USE CASE

Integrated with proprietary software and used in a mobile setting and where payments need to be accepted (such as: event admissions, registration fee payment, acceptance, fine, and other usage fee payments). Ideal for private and public sector applications.
