

Virtual Terminals

How It Works

Our virtual OneTerminal is ideal for call center and phone-in orders, in-person EMV payments, and all card-present or card-not-present environments. Its dropdown menus, custom data fields, and departmental logos make it the terminal every department or location can use. Schedule payments, send pay now links, manage cash receipts, and more with OneTerminal.

Why Use Our OneTerminal?

- Supports multiple locations, unlimited users
- Generates email pay-now links and automated receipts
- Cash payment tracking and drawer management

QUICK FACTS

Cloud-based, works on existing computers and devices.

Easy to Install and Customizable

Ideal for digital and in-person transactions

USE CASE

All organizations that need a single payment solution customized by the department and manageable down to the employee level.
